

## CAMS 2012 Military Theme “War in the Desert”

The scope of this theme is very wide-ranging, covering all land conflicts and related naval and air actions from antiquity to the present day, in an area covering all of North Africa, the Mediterranean, the Middle East, Iran, Iraq and Afghanistan.

For the figure or ship modeler, the possibilities are endless. Conflicts to consider include the Roman-Carthaginian wars; the Crusades; various Colonial conflicts; Napoleon’s Egyptian expedition; both World Wars and the ongoing operations in the Persian Gulf states.

The armor or aircraft modeler has an endless string of 20<sup>th</sup> Century conflicts to choose from, as well as recent operations in Iraq, Afghanistan and Libya. Small scale local conflicts, such as the Ethiopia-Eritrea war, offer some interesting possibilities for unique builds.
